

How to Play "Tally Rally" ENGLISH

- To play Tally Rally, you need a pen or pencil, a piece of paper, and a timer or clock.
- The goal is to draw as many tally marks as you can in one minute (60 seconds).
- Set the timer for 60 seconds.
- When someone says, "Go!", and starts the timer, proceed to draw tally marks as fast as you can! Your tally marks don't have to be "neat", but they have to look like tally marks.
- How to draw tally marks:

- When your time is up, STOP IMMEDIATELY!
- Count the number of tally marks you drew. That is your score (IF you didn't mess any up along the way).
 - For example, if you drew the following ...

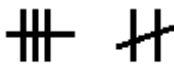

- ... your score would be **38**.
- If a tally mark is "small", but bigger than a dot, count it as a full tally mark.

- For example: **3** **5**
- If there are more than five tally marks in one "cluster", count it as a "cluster" of five tally marks.

- For example: **5** **5**
- If there are fewer than four vertical tally marks with a "crossing" tally mark in one "cluster", don't count the "crossing" tally mark.

- For example: **3** **2**
- If a "cluster" contains more than one "crossing" tally mark ...
 - ... if the "cluster" contains four vertical tally marks, count ONLY ONE of the "crossing" tally marks.

- For example: **5**

- ... if the "cluster" contains fewer than four vertical tally marks, do not count ANY of the "crossing" tally marks.

- For example: **3**

- **Please use "crossing" tally marks!** Please don't draw only vertical tally marks!

- **I don't like this:** **24**
- I consider 200 to be a "good" score.
